WATER TANKS FOR FIRE FIGHTING

INNOVATION WITH IMPACT

N.A.Z. Industries LLC has successfully engineered and delivered **20 fire-fighting water tankers** for the GCC municipalities.. The units were designed to meet stringent fire safety and municipal standards, balancing capacity, flow rate, and endurance under demanding operating conditions.

Each unit reflects a deep understanding of reliability and safety. By merging technical precision with craftsmanship, N.A.Z. supports government fleets with equipment designed for rapid response and long-term dependability.

TRUCK & FLEET CONFEX

VOICES THAT DRIVE THE FUTURE

The Truck & Fleet Confex 2025, held on 16 September, brought together industry leaders to discuss the future of commercial transport and fleet operations in the region.

N.A.Z. Industries proudly supported the event as a sponsor and contributed to two key panel discussions that shaped the ongoing conversation on transport innovation across the GCC.

Mr. Aijaz, GM of Oil & Gas Projects, joined the OEM & Manufacturer Roundtable, while Mr. Adel Mir, CEO of N.A.Z. Industries, spoke on the Fleet Aftersales & Uptime panel, discussing how manufacturers and operators can collaborate to maximize productivity and reduce downtime.

“Every hour a trailer is idle is money lost. Our job is to reduce that impact as much as possible.”

— Adel Mir, CEO, N.A.Z. Industries

The Confex reinforced a shared purpose across the sector: to strengthen infrastructure, enable smarter fleets, and elevate manufacturing standards within the region.

AERIAL PLATFORM

ELEVATING PERFORMANCE

N.A.Z. continues expanding its special projects portfolio with the development of Aerial Work Platforms (Man Lift) engineered for high-reach operations in construction, aviation, oil & gas, and utilities.

Each platform is custom-built to client specifications, integrating advanced hydraulic systems, safety controls, and insulation options for varied environments. Designed and tested to perform under demanding conditions, these systems are a testament to how engineering precision meets operational safety.

A growing number of regional contractors are now turning to N.A.Z. for high-performance, localized alternatives that meet global standards.

IN THEIR WORDS >>>>>

CUSTOMER EXPERIENCE

Mr. Noel Joubert
GM- Fujairah National Quarry

CUSTOMISING FOR FUJAIRAH NATIONAL QUARRY

Fujairah National Quarry, part of the Fujairah Building Industries Group, turned to N.A.Z. Industries to strengthen their transport operations with tailored equipment capable of handling heavy-duty.

The result was a fleet of **18 cu.m. Hardox tippers, block carrier semitrailers, and customised truck bodies** designed for quarry operations. The first delivery was completed on schedule, and after a full year in operation, not a single trailer experienced any breakdowns.

“It’s been working now for one year, and we haven’t had any damage. We didn’t need to do any maintenance until now.”

— Noel Joubert

The upgrade from a 16m³ to an 18m³ Hardox tipper didn't compromise on structure thus reinforcing NAZ's mission as a solutions provider.

BEHIND THE CHASSIS

PRAKASH, SENIOR DESIGN ENGINEER

At the core of every N.A.Z. trailer lies a design that blends technology, experience and foresight.

Prakash, Senior Design Engineer, leads this process, transforming concepts into optimized chassis systems through advanced 3D modeling and FEA (Finite Element Analysis).

His work ensures every product achieves ideal weight distribution, structural integrity, and fatigue resistance, critical factors in oil & gas and logistics applications where reliability defines reputation.

In an industry driven by timelines and tonnage, engineers like Prakash make sure every design withstands both.

Mr. Prakash – Senior Design Engineer

ISO CERTIFICATIONS 2025 QUALITY REAFFIRMED

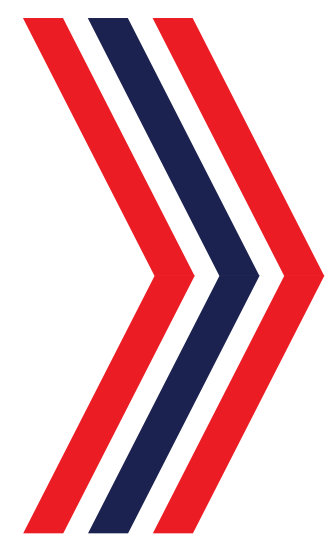

N.A.Z. Industries has successfully renewed its **ISO 9001:2015**, **ISO 14001:2015**, and **ISO 45001:2018** certifications, reaffirming the company's ongoing commitment to the highest global standards in **quality management, environmental responsibility, and occupational health and safety**.

These renewed certifications underscore a disciplined approach to process management and continuous improvement.

Partner with a manufacturer certified to deliver consistency, safety, and trust.

MOVING FORWARD

From municipal infrastructure to quarry logistics, from specialized aerial systems to renewed certifications, this quarter demonstrates one truth: **Precision and consistency are the real measures of reliability.**
